OBJECTIVE

- Aspiring Information Technology graduate with a strong foundation in programming and software development. Looking for an opportunity to begin my professional career in a dynamic organization where I can enhance my skills and contribute to the company's growth.

SKILLS

SOFT SKILLS

- Problem Solving
- Time Management

TECHNICAL SKILLS

- Java
- python
- C(basic)
- Html , CSS

EDUCATION

- GLOBAL MATRIC HR SEC SCHOOL
percentage : 73.83
2022 - 2023
- B.TECH
INFORMATION TECHNOLOGY
V.S.B Engineering college,karur
secured 7.63 CGPA Till 5 th Semester

PROJECT

- Hawk AI | Deep Learning, Computer Vision, Python, OpenCV
 - Designed and developed an automated attendance management system powered by deep learning and facial recognition, operating exclusively through existing smart board cameras — requiring zero additional hardware installation.
 - Implemented real-time face detection and identification pipeline using convolutional neural networks, achieving high accuracy under varied lighting and classroom conditions.
 - Generated automated attendance reports and integrated the system with institutional databases, significantly reducing administrative overhead and human error.

CERTIFICATIONS

- Nptel : Programming in java
- Infosys : java Foundation Certification

INTERNSHIP

- Encapsulate IT | 2024 - 2025
- Full Stack web Development For 30 Days in the Encapsulate IT Company
